Available May - December 2025 | Local: Boston | Open to Relocation

Education

Northeastern University Boston, MA
Khoury College of Computer Sciences, 3.58/4.0 GPA September 2023 - Present
Candidate for a Bachelor of Science in Computer Science, Concentration in Artificial Intelligence Expected May 2027
Relevant Coursework: Object Oriented Design, Algorithms, Machine Learning & Data Mining 1, Artificial Intelligence, Human Computer Interaction, Database Design, Mathematics of Data Models, Discrete Structures, Foundations of Cybersecurity, Fundamentals of Computer Science 1 & 2

Technical Skills

Languages: Java, Kotlin, Python, JavaScript, TypeScript, SQL, HTML, CSS, R
Frameworks & Libraries: React, Node.js, Express, JUnit, Tailwind CSS, Flask, Swing, Jetpack Compose
Databases: SQLite, MongoDB, Redis, PostgreSQL, MySQL
Tools: Git, GitHub, VS Code, IntelliJ Idea, LaTeX, Docker, RStudio, Android Studio, Windows, MacOS, Linux
AI/ML: NumPy, ggplot2, SciPy, PyTorch, Matplotlib

Projects

ThreeTrios | Java, Swing, JUnit October 2024

- Created a turn-based card game using Object-Oriented Programming principles and the MVC architecture
- Applied Command, Callback, and Builder design patterns to enhance code readability and maintainability
- Wrote comprehensive JUnit tests with 100% coverage to ensure robust functionality and smooth integration

EasyClassPlanner | React, Rust, Typescript May 2024

- Employed Recursive Backtracking on a Rust backend to generate ideal schedules given a list of classes and available times in milliseconds
- Implemented a custom calendar UI that dynamically scales to the schedule's class timings
- Integrated analytics to track usage patterns, enabling data-driven decisions to refine key features

X Finance (X Developer Challenge) | Python, Flask, React, X API, X.ai API April 2024

- Collaborated with three teammates to build a web application leveraging Tweet data, X.ai's Grok LLM, and stock price history to analyze and generate insights on stock trends
- Scrapes and processes 5000+ tweets containing AI generated hashtags relevant to the related stock
- Integrated a dynamic front-end to display sentiment analysis and historical price trends of a stock

LinguaLink | WebRTC, Firebase, React March 2024

- Developed language learning website enabling users to select a target language and engage in real-time video and text chat using WebRTC and Firebase
- Integrated AI powered chat functionality supporting 40+ target languages through Google's Gemini API
- Achieved 2nd Place in a 48-hour hackathon with 120+ participants

Basketball Scouting | SQLite, Express, React March 2024

- Designed a full-stack application allowing users to create profiles, search for basketball players, and view detailed player statistics using React, Express, Node.js, and SQLite
- Implemented full CRUD operations for seamless database interaction and efficient profile management

Work Experience

Apprentice Technician April 2024 - August 2024
Mercedes Specialist of Oxford Oxford, MS

- Performed repairs on 100+ Mercedes-Benz, AMG, and Porsche vehicles ensuring high-quality standards
- Diagnosed mechanical and electronic issues using XENTRY diagnostic software
- Efficiently completed services within tight deadlines, ensuring customer schedules were consistently met

Interests

Travel, French Language, Pickleball, Basketball, Football, Cars
